- Support industrial communications standards such as PROFINET
- Advanced Interference Mitigation Suite offers significant reduction in interference in harsh and noisy industrial environments
- Due to the wide operating temperature range and a robust design with enhanced surge, ESD, and vibration protection, VX200 can be used in harshest conditions with the highest reliability

## Applications

- The VX200, with fast roaming technology, enhanced vibration protection and compact design, is ideally suited for installation on AGV or AS/RS platform in factories, logistics centers, and warehouses

- Due to its superior coverage and flexible deployment options, the VX200 is the most affordable high-performance CPE in the market for real-time device monitoring, remote management, and data collection in a wide range of industrial environments

- With support for industrial standards such as PROFINET, the A8n (ac) Super WiFi Base Station/ A3-Ei AP and VX200 offers the most cost-effective solution for factory automation, enabling automate production across all levels

## Super Dual-band Coverage

| | |
|---|---|
| Max. LOS AP Access with 5dBi Omni | 350 m (2.4 GHz) 250 m (5 GHz) |
| Max. LOS CPE with 5dBi Omni | 2 km to A8-Ein (ac) 1.5 km to A3-Ei |
| Max. Data Rate | 300 + 867 Mbps |

## Key Features and Benefits

- **Dual-Band Concurrent** Operating in both 2.4 GHz and 5 GHz bands, the VX200 is backward-compatible with existing 802.11a/b/g/n/ac deployments

- **Wave 2 MU-MIMO** MU-MIMO significantly improves multi-client capacity, and dual radios deliver data rates up to 867 Mbps at 5 GHz and 400 Mbps at 2.4 GHz

- **Fast Roaming Technology** Allows the VX200 to roam seamlessly between APs, with handover time of < 120 ms under WPA2

- **Redundant Link** VX200's dual radios can connect to two APs simultaneously, with one as an active link and the other as backup, ensuring a highly reliable wireless connection

- **Compact Size** The VX200's size is 120x85x32mm; making it one of the smallest Industrial CPEs in the market

- **Anti-Vibration** Enhanced vibration and shock protection (IEC60068-2-6 and IEC60068-2-27 standards) makes the VX200 ideally suited for installation on AGV/AS/RS platforms

- **Industrial Ruggedness** Integrated power isolation and enhanced surge and ESD protection against environmental interference

- **Graphene Coating** Industrial-grade housing with Advanced Graphene Coating helps VX200 dissipate heat even in confined space.

- **Flexible Deployment Options** Supported by multiple management platforms: standalone, controller, or cloud-based / on-premises by AltaiCare
